

TABLE OF CONTENTS

VOLUME I

Foreword	iii
Submissions and consultations	xiii
<i>Overview</i>	1
<i>Taxation of physical assets and goodwill</i>	75
Chapter 1: Towards a new policy framework for wasting assets	77
Chapter 2: The case for accelerated depreciation	115
Chapter 3: Trading stock and similar assets	125
Chapter 4: Determining the appropriate treatment of goodwill	133
<i>Taxation of financial assets and liabilities</i>	141
Chapter 5: Towards a new policy framework for financial assets and liabilities	143
Chapter 6: General application of the policy framework for financial assets and liabilities	157
Chapter 7: Debt/equity hybrids and synthetic arrangements	195
<i>Taxation of leases and rights</i>	213
Chapter 8: Towards a new policy framework for leases and rights	215
Chapter 9: Leases and similar arrangements over wasting assets	231
Chapter 10: Other leases and rights	267
<i>Taxation of capital gains</i>	281
Chapter 11: Towards a more competitive regime for taxing capital gains	283
Chapter 12: Indexation, averaging and quarantining of losses	303
Chapter 13: Involuntary receipts	315
Chapter 14: Disposal of partnership assets and interests	327
VOLUME II	
<i>Taxation of entities</i>	341
Chapter 15: A fairer and more consistent treatment of entity distributions	343
Chapter 16: An alternative treatment for collective investment vehicles	367

Chapter 17: How a redesigned imputation system would apply to entities	377
Chapter 18: Defining 'distribution' in an entity regime	401
Chapter 19: Distinguishing profit and capital distributions	423
Chapter 20: Preventing double taxation of buy-backs, redemptions and liquidations	451
Chapter 21: Consistent treatment of entity income	469
Chapter 22: Bringing trusts into the new entity regime	479
Chapter 23: Bringing all co-operatives into the new entity regime	507
Chapter 24: Anti-avoidance provisions	515
<i>Taxation of entity groups</i>	529
Chapter 25: A case for consolidation	531
Chapter 26: A framework for consolidation	543
Chapter 27: Determining the cost base for disposal of equity	569
Chapter 28: Towards single recognition of losses and gains	591
Chapter 29: Towards a systemic solution to CGT value shifting	611
<i>Taxation of international income</i>	631
Chapter 30: Investment in Australia by non-residents	633
Chapter 31: Conduit investment through Australia	651
Chapter 32: Foreign source income of residents	663
Chapter 33: Allocating worldwide taxable income between countries	695
<i>Taxation of life insurance</i>	711
Chapter 34: Building a more consistent regime for life insurers	713
Chapter 35: Life insurance policyholders	735
Chapter 36: Pooled superannuation trusts	757
Chapter 37: Implications for superannuation funds and approved deposit funds	763
<i>Taxation of fringe benefits</i>	769
Chapter 38: Towards a better regime for taxing fringe benefits	771
<i>Implications of reform for revenue</i>	795
Chapter 39: A revenue neutral perspective	797
Glossary	813
Index	833

List of tables

Overview	Table 1:	A revenue neutral trade-off between a broader base and a 30 per cent company tax rate	69
	Table 2:	The scope to implement alternative taxation arrangements for capital gains in a revenue neutral manner	71
	Table 3:	National objectives	73
Chapter 1	Table 1.1:	Expenditures to be considered under possible 'blackhole' treatment	101
	Table A.1:	Summary of existing tax treatment of selected wasting assets	103
	Table B.1:	Taxation depreciation by broadband	105
	Table B.2:	Effective depreciation loadings within bands	106
Chapter 5	Table 5.1:	Comparison of zero coupon bond and standard bond	150
	Table 5.2:	Timing adjustment applied to a zero coupon bond	150
Chapter 6	Table 6.1:	Timing adjustment approach — possible application to some basic financial instruments	161
	Table 6.2:	Assumed BBSW	165
	Table 6.3:	Calculation of taxable gain	166
	Table 6.4:	Summary of taxable gain for variable interest rate loan	166
	Table 6.5:	Comparative treatment of extinguishment gains	182
	Table B.1:	Assumed BBSW	187
	Table B.2:	Gain/loss on floating leg	188
	Table B.3:	Gain/loss on fixed leg	188
	Table B.4:	Summarising taxpayer's gain/loss in each income year	188
Chapter 7	Table A.1:	Equity swaps	210
	Table A.2:	Synthetic equity notes	211
	Table A.3:	Endowment warrants	212
Chapter 11	Table 11.1:	United States individuals and companies — income and CGT rates	292
	Table 11.2:	United Kingdom individuals and companies — income and CGT rates	292
Chapter 12	Table 12.1:	Comparison of 1/2 and 1/5 year averaging where other income is zero	311
	Table 12.2:	Comparison of 1/2 and 1/5 year averaging where other income is \$20,000	311

Table of contents

Chapter 13	Table A.1: Involuntary receipts — summary of existing provisions and possible reform, Option 2	324
Chapter 15	Table 15.1: Comparison of the options for achieving integrity through the entity chain	356
	Table 15.2: Illustration of the tax impact of temporary tax preferences	357
Chapter 17	Table 17.1: Comparison between 'gross-up and credit' and 'inter-corporate dividend rebate' approaches where the receiving entity has a loss	393
	Table 17.2: Comparison of mechanisms to prevent double company tax	395
	(a) Distributions through the entity chain to an individual investor	395
	(b) Deductions against dividend income and other income	396
	(c) Carry-forward losses	397
	Table 17.3: Tax-paid franking account for inter-entity distributions (using deferred company tax)	389
Chapter 18	Table 18.1: Options for treating loans from entities to members	413
	Table 18.2: Application of income tax or FBT under Option 3	416
	Table 18.3: Comparison of options for the definition of distribution	417
Chapter 19	Table B.1: Transitional treatment of assets in trusts at commencement date	443
Chapter 23	Table 23.1: Comparison between current and proposed treatment of tax co-operatives	511
Chapter 25	Table A.1: Liquidation involving in-kind distribution to a single parent company	540
Chapter 26	Table 26.1: Comparison of options for allowing losses to be brought into a consolidated group	565
Chapter 27	Table 27.1: Treatment of loss cascading, loss and gain duplication and value shifting	580
	Table 27.2: Other issues arising from the method of reconstructing equity cost base	582
	Table 27.3: Transition	584
	Table 27.4: Treatment of groups that defer consolidation, incremental acquisition and pre-capital gains tax status	585
	Table A.1: Calculation of realisable gain from Subco	589

Chapter 28	Table 28.1: Illustration of how the test could be failed	599
	Table 28.2: Illustration of how the test could be satisfied	599
	Table 28.3: Removing duplication of unrealised losses — comparison of the options	601
	Table 28.4: Removing duplication of realised and unrealised gains by extending the allowance of capital loss to new equity owners — advantages and disadvantages	602
	Table 28.5: Removing duplication of realised losses and gains using the consolidation models — advantages and disadvantages	604
Chapter 29	Table 29.1: Possible generalised value shifting model — summary	624
Chapter 30	Table 30.1: Operation of entity tax/DWT switch — fully franked dividends	638
	Table 30.2: Operation of entity tax/DWT switch — unfranked dividends	639
	Table 30.3: Operation of entity tax/DWT switch — balanced portfolio	640
	Table 30.4: Portfolio investor — effect on \$100 of distributed income (36 per cent company rate and deferred company tax)	640
	Table 30.5: Portfolio investor — effect on \$100 of distributed income (36 per cent company rate and RDWT)	641
	Table 30.6: Portfolio investor — effect on \$100 of distributed income (30 per cent tax rate and deferred company tax)	641
	Table 30.7: Rates of tax for non-resident taxpayers other than companies	646
Chapter 31	Table 31.1: Operation of foreign income account — exempt non-portfolio dividends	658
	Table 31.2: Operation of foreign income account — income subject to the foreign tax credit system	659
	Table 31.3: Operation of foreign income account — foreign branch profits	659
Chapter 32	Table 32.1: Impact of allowing imputation credits for foreign dividend withholding tax	673
Chapter 34	Table 34.1: Classes of business of life insurers and the associated rates of tax	715

Chapter 35	Table 35.1: Difference in the net tax payable on policies held for 10 years or less under Options 2 and 3 compared with the current treatment (Option 1)	756
	Table 35.2: Difference in the net tax payable on policies held for more than 10 years under Options 2 and 3 compared with the current treatment (Option 1)	756
Chapter 38	Table 38.1: The fringe benefit disadvantage on \$100 of gross salary	774
	Table 38.2: Statutory formula percentages	778
	Table 38.3: The ‘family six’ choice — to package or to buy	779
	Table 38.4: The effective rate of tax and revenue cost of the ‘family six’ travelling 15,000km in the FBT year	780
	Table 38.5: Net after-tax income change from packaging a ‘family six’ doing 15,000km p.a.	780
	Table 38.6: The alternative formulas with assignment and taxing to individuals of the benefits to be reportable on group certificates from 1999-2000	781
	Table B.1: Net after-tax income change from packaging a ‘family six’ doing 15,000km p.a.	787
	Table B.2: Current formula, implied private usage as kilometres vary, ‘family six’	788
	Table B.3: Possible alternative statutory formulas	788
	Table B.4: Net after-tax income change from packaging a ‘family six’ doing 15,000km p.a.	789
	Table C.1: The ‘gross up’ calculation	792
	Table C.2: FBT collections for 1997-98	793
	Table C.3: Revenue costs of selected FBT concessions, 1996-97	794
	Chapter 39	Table 39.1: A revenue neutral trade-off between a broader base and a 30 per cent company tax rate
Table 39.2: The scope to implement alternative taxation arrangements for capital gains in a revenue neutral manner		806
Table A.1: Other investment and CGT options		808
Table A.2: CGT stepped rate with six-year phase down— Option 1		809
Table A.3: CGT stepped rate with six-year phase down — Option 2		810
Table A.4: CGT stepped rate with ten-year phase down — Option 1		810
Table A.5: CGT stepped rate with ten-year phase down — Option 2		811

List of figures

Overview	Figure 1: Global investment neutrality	21
	Figure 2: Two components of asset-related income	28
	Figure 3: Depreciating value of typical wasting asset	31
	Figure 4: Change in asset value	32
	Figure 5: General treatment for non-private expenditure during the year	40
	Figure 6: Different entities — different tax outcomes	49
	Figure 7: Consistent entity treatment	53
Chapter 1	Figure 1.1: Capital allowances — some variations on a theme	80
	Figure 1.2: An integrated model for capital allowances	82
	Figure 1.3: A standard capital allowances model	83
	Figure B.1: Depreciation for assets with effective lives up to 50 years	106
Chapter 2	Figure 2.1: Comparison of the existing accelerated depreciation regime with an effective life plus 50 per cent loading	123
Chapter 8	Figure 8.1: Tax profile of an assigned finance lease	222
Chapter 10	Figure 10.1: Five year lease over land	270
Chapter 12	Figure 12.1: CGT averaging — how it is abused	308
Chapter 15	Figure 15.1: How deferred company tax would work at the entity level	350
	Figure 15.2: The effect of refunding RDWT when distributions flow through to non-resident investors	351
	Figure 15.3: The current tax treatment when distributions flow through to non-resident investors	351
	Figure 15.4: 17 per cent marginal rate taxpayer	361
	Figure 15.5: 47 per cent marginal rate taxpayer	362
Chapter 16	Figure 16.1: An intermediate category of taxation treatment	370
Chapter 17	Figure 17.1: How deferred company tax could be calculated	379
	Figure 17.2: How imputation could apply to a distribution between entities	391
	Figure 17.3: Credits used to offset tax payable on other income of the recipient entity	392
Chapter 19	Figure 19.1: Profits first rule	426

	Figure 19.2: Slice approach	427
